

Shaikh Athar Ahmed

Aspiring SOC Analyst | SIEM | Incident Response | Blue Team

✉ sk.athar018@gmail.com | ☎ [+918073722572](tel:+918073722572) | 🌐 [LinkedIn](#) | 🔗 [Github](#) | 🔗 [TryHackMe](#)

Summary

Aspiring SOC Analyst with practical experience in SIEM-based alert triage using Splunk and ELK, PCAP analysis, and malware investigation. carried out end-to-end malware analysis, mapping results to the MITRE ATT&CK framework and identifying command-and-control (C2) communication. solid background in threat detection, incident triage, and log analysis with an emphasis on supporting actual security operations settings.

Education

CMR University CGPA: 8.27/10 (7th Sem)
B.Tech Computer Science and Engineering November 2022 - June 2026
Relevant Coursework: Ethical Hacking, Cloud Computing Security, Digital Forensics, Network Security

Projects

Traffic Analysis – Malware Infection Investigation October - 2025

- Investigated a malware infection originating from a fake website download using PCAP analysis
 - Analyzed network traffic to identify PowerShell-based malware behavior, command-and-control (C2) communication, and data exfiltration
 - Correlated network events using Zeek, Wireshark, and ELK Stack to reconstruct the attack timeline
 - Documented findings, indicators of compromise (IOCs), and conclusions in a SOC-style incident report
- [Traffic Analysis Project \(Github\)](#)

Red Teaming Demonstration April 2025

- Simulated real-world attacker behavior by deploying a C2 framework using Metasploit and executed a DDoS attack simulation using hping3
- Identified SOC-relevant indicators, such as unusual traffic volume, repeated connection attempts, and suspicious command execution

Skills

Security Monitoring & Analysis: Log Analysis, Incident Triage, Incident Response, Threat Detection, MITRE ATT&CK Mapping	Network Fundamentals: TCP/IP, DNS, HTTP/HTTPS, Firewall Logs, Network Traffic Analysis
Host & Log Analysis Windows Event Logs, Sysmon, Linux Logs, Endpoint Monitoring	SIEM & Detection Tools Splunk, ELK Stack, Zeek, Wireshark, Snort, Brim
Operating System: Kali Linux, Windows	

Certifications & Achievements

SOC Level 1 - TryHackMe January 2026
Skills: SIEM Triage, Network Traffic Analysis, Windows & Linux Security Monitoring, Phishing Analysis
[Credential - TryHackMe](#)

Cybersecurity 101 - TryHackMe September 2025
Skills: Linux Fundamentals, Networking Fundamentals, SIEM Basics, MITRE ATT&CK
[Credential - TryHackMe](#)

Google Cybersecurity - Coursera August 2025
Skills: Threat Modeling, Threat Detection, Linux
[Credential - Coursera](#)

Hackquest (CMR University) April 2025
1st Place for demonstrating red teaming techniques with corresponding detection and mitigation strategies
[Certificate](#)
