

Shaikh Athar Ahmed

Security Operations Center Analyst Intern

+918073722572 | sk.athar018@gmail.com | LinkedIn | Github | TryHackMe

Summary

Aspiring SOC Analyst with strong foundations in cybersecurity, network traffic analysis, and security monitoring. Hands-on experience in PCAP analysis, SIEM monitoring, threat detection, and incident investigation using industry-standard tools. Actively seeking an internship to apply defensive security skills in a real-world SOC environment.

Education

CMR University

November 2022 - June 2026

B.Tech Computer Science and Engineering

CGPA: 8.27/10 (7th Sem)

Relevant Coursework: Ethical Hacking, Cloud Computing Security, Digital Forensics, Network Security

Projects

Traffic Analysis – Malware Infection Investigation

October - 2025

Traffic Analysis Project (Github)

- Investigated a malware infection originating from a fake website download using PCAP analysis
- Analyzed network traffic to identify PowerShell-based malware behavior, command-and-control (C2) communication, and data exfiltration
- Correlated network events using Zeek, Wireshark, and ELK Stack to reconstruct the attack timeline
- Documented findings, indicators of compromise (IOCs), and conclusions in a SOC-style incident report

Red Teaming Demonstration

April 2025

- Simulated real-world attacker behavior by deploying a C2 framework using Metasploit and executed a DDoS attack simulation using hping3
- Identified SOC-relevant indicators, such as unusual traffic volume, repeated connection attempts, and suspicious command execution

Skills

Security Monitoring & Analysis:

Log Analysis, Network Traffic Analysis, Incident Triage

SIEM & Detection Tools:

Splunk, ELK Stack

Network & Host Tools:

Wireshark, Zeek, Brim, Snort, Windows Event Viewer, Sysmon

Operating System:

Kali Linux, Windows

Certifications & Achievements

Google Cybersecurity - Coursera

August 2025

Credential - Coursera

Skills: Threat Modeling, Threat Detection, Linux

Cybersecurity 101 - TryHackMe

September 2025

Credential - TryHackMe

Skills: Linux Fundamentals, Networking Fundamentals, SIEM Basics, MITRE ATT&CK

SOC Level 1 - TryHackMe

January 2026

Credential - TryHackMe

Skills: SIEM Triage, Network Traffic Analysis, Windows & Linux Security Monitoring, Phishing Analysis

Hackquest (CMR University)

April 2025

Certificate

1st Place for demonstrating red teaming techniques with corresponding detection and mitigation strategies
