

Shaikh Athar Ahmed

Associate SOC Analyst | SIEM | Incident Response | Blue Team

✉ sk.athar018@gmail.com | 📞 +918073722572 | 🌐 LinkedIn | 🐙 Github | 🏠 TryHackMe

Summary

SOC Analyst with hands-on experience in SIEM-based alert triage using Splunk and ELK, PCAP analysis, and malware investigation. Conducted end-to-end malware analysis with MITRE ATT&CK mapping, including the identification of command-and-control (C2) communications and malicious network activity. Skilled in threat detection, incident triage, log analysis, IOC analysis, and supporting security operations through SOC-style investigations. Experienced in analyzing Windows and Sysmon logs, correlating security events, and documenting findings through structured incident reports and threat-hunting activities.

Experience

Uptoskills	February 2026 - May 2026
Cybersecurity Analyst Intern	
• Performed vulnerability assessments on public-facing web applications and infrastructure using Nmap, OWASP ZAP, Burp Suite, and SQLMap	
• Conducted reconnaissance and attack surface analysis using OSINT techniques and TheHarvester	
• Analyzed network traffic using Wireshark to identify suspicious activity patterns and correlate security findings	
• Documented vulnerabilities, attack vectors, and remediation recommendations in structured security reports	

Education

CMR University	CGPA: 8.35/10
B.Tech Computer Science and Engineering	November 2022 - June 2026
Relevant Coursework: Ethical Hacking, Cloud Computing Security, Digital Forensics, Network Security	

Projects

Traffic Analysis – Malware Infection Investigation

- Investigated malware infection through PCAP and network traffic analysis
- Identified PowerShell-based malware behavior, C2 communication, and exfiltration activity using Wireshark, Zeek, and ELK Stack
- Documented IOCs and attack timeline with MITRE ATT&CK mapping in a SOC-style incident report

SOC Detection Engineering Lab

- Built a hands-on SOC lab using Splunk, Sysmon, Kali Linux, and Windows event logs to simulate real-world attack and monitoring scenarios.
- Configured centralized log collection and security monitoring workflows for endpoint and network activity analysis.
- Developed and tested custom detection rules for suspicious activities including reconnaissance and malicious PowerShell execution.
- Performed threat hunting and incident investigation using Splunk queries, Sysmon telemetry, and Windows Event Logs.
- Conducted attack simulations in a controlled environment to improve detection visibility and SOC investigation workflows.

Skills

SIEM & Detection:

Splunk, ELK Stack, Snort, Brim

Network & Log Analysis:

Wireshark, Zeek, TCP/IP, DNS, HTTP/HTTPS, Firewall Logs, Windows Event Logs, Sysmon, Linux Logs

Threat Detection & Incident Response:

Alert Triage, IOC Analysis, PCAP Analysis, Malware Investigation, MITRE ATT&CK Mapping

Security Tools:

Nmap, Burp Suite, OWASP ZAP, SQLMap, TheHarvester

Certifications & Achievements

SOC Level 1 - TryHackMe	January 2026
Cybersecurity 101 - TryHackMe	September 2025
Google Cybersecurity - Coursera	August 2025
Hackquest (CMR University)	April 2025
1st Place – Hackquest Cybersecurity Competition, CMR University
