Summary

Aspiring SOC Analyst with a strong Cybersecurity and Ethical hacking foundations. Eager to gain hands-on experience and develop skills and learn through internships.

Education

CMR University
Computer Science and Engineering
CGPA: 8.27 (7th Sem)

November 2022 - July 2026
B.Tech

Courses: Ethical Hacking, Cloud Computing Security, Digital Forensics and Network Security.

Projects

Red Teaming Demonstration
Live demonstration of C2 Framework using Metasploit and DDOS attack using custom made Python program and hping3
Kali Linux, C2 framework, Python

April 2025

Traffic Analysis (Download from fake website)
 [Analysis](#)
Performed full PCAP-based investigation using Zeek, Wireshark, and ELK to identify PowerShell-based malware, C2 traffic, and data exfiltration; documented findings in a professional SOC-style report.

October 2025

Skills

Network Analysis Zeek, Wireshark, Brim, Snort	Kali Linux, Windows	SIEM Splunk, ELK Stack
---	----------------------------	----------------------------------

Certifications

Google Cybersecurity
Coursera
 [Verify](#)
Skills: Threat Modelling, Threat Detection, Linux

Cybersecurity 101
TryHackMe
 [Verify](#)
SIEM, Linux Fundamentals, Networking Fundamentals, Cryptography Fundamentals, FlareVM, Red Teaming Fundamentals

September 2025

SOC Level 1 (Current)
TryHackMe
SIEM Triage, Threat Analysis Tools, Windows Security Monitoring, Linux Security Monitoring, Network Traffic Analysis, Phishing Analysis

Estimated: January 15th, 2026

Awards

Hackquest
CMR University
 [Certificate](#)
First place in the competition for demonstrating red teaming capabilities and detection and mitigation techniques

April 2025
